

**Mark Frisse, MD, MS, MBA**  
**Vanderbilt University**

Mark Frisse is a professor of Biomedical Informatics at Vanderbilt University. Working through the office of the Governor of the State of Tennessee, he directs a federal- and state-sponsored health information exchange in the greater Memphis area with over 2 million records covering the care of over 1,000,000 individuals. He is active in a number of Markle Foundation efforts and served as a co-chair of the Connecting for Health Common Framework policy group developing model data sharing agreements. He is a participant in the RWJ Project HealthDesign personal health records initiative. Dr. Frisse has worked in the academic sector, in consulting, and in pharmacy benefits management. He has served as a board member of the American Medical Informatics Association, the eHealth Initiative, the State of Tennessee Governor's eHealth Task Force, and SureScripts, LLC.

A graduate of Notre Dame, Washington University, and Stanford, Dr. Frisse is a board certified internist trained in hematology-oncology. He was Professor of Medicine and Associate Dean at the Washington University School of Medicine. He served as VP and Chief Medical Officer at Express Scripts and played a role in developing consumer web sites, the DrugDigest.org consumer resource, and RxHub. He later served as VP at First Consulting Group where he worked in areas of clinical quality measurement, clinical information systems design, clinical transformation, and health information systems implementations. Active in a wide range of technology and policy issues at the local, state, and national level, Dr. Frisse authored over 50 scientific publications.
